

# CREATING SET MENUS WITH PLU LIMITS

You will need to create **the Master PLU** and all PLUs first. Here we will set up a Valentines Day set menu.

I have created a Valentines Day PLU as the Master PLU and **ticked Set Menu Item**.

You will need to create each **slave PLU** (PLUs that form the set menu) and **assign them** to a set menu group. Here I have created a Rosemary Tomahawk steak and assigned it to a set menu group called **MAINS**. Do the same for all slave PLUs.

From the PLU grid click on the Master PLU and click the **PLU Limit** button.

This will open the **PLU Limits** Window.

Tick the Set menu field. You will be asked to make this PLU the **Set Menu Master**. Click YES

The screenshot shows the "PLU Limits" window for "Valentines Day". The window has a title bar and a toolbar with "Edit", "Add", "Delete", and "Exit" buttons. Below the toolbar is a table with columns: PLU, ITEM, Setmenu Group, Qty, and Mode. A "Set Menu" checkbox is checked. A modal dialog box is open in the center, titled "Pilot Admin". The dialog contains a question mark icon and the text: "You are changing this PLU to be a Set Menu Master. Do you wish to continue?". At the bottom of the dialog are "Yes" and "No" buttons.

Click the Add button to start linking slave PLUs to the Master PLU.

Click on each slave PLU that forms part of this set menu and select a **mode** for each slave PLU. Enter the quantity of how many slave PLUs may be ordered in its Set menu Group. If you have a price on Your Set menu **Master** you would select **NO Charge Mode**. Click the Link button. Do this for all slave PLUs that form **part of your set menu**.
